

Bowland Ecology Ltd (est. 2005) is an ecological consultancy based in the north west of England, working on projects throughout the UK. Our vision is to be recognised and respected as a high quality practice. To achieve this project work is allocated to technical staff with the appropriate skills and experience to undertake the work. Our style is to be initiative driven: we adopt a 'can do', attitude to our clients', requests and continually strive to improve our levels of technical and professional service.

Our in house team has a wide range of experience in the public, private and voluntary sector working on both large and small developments.

- **Baseline ecological survey:** Phase 1 habitat survey, River Corridor Survey, River Habitat Survey, desk study, data and literature review.
- **Ecological Assessment:** pre-purchase risk assessment, support with planning applications, planning appeals, Environmental Statements, project & plan based appropriate assessment.
- **Protected species surveys (including licensed work):** bats, great crested newt, natterjack toad, otter, water vole, badger, dormouse, reptiles, white-clawed crayfish, birds and plants.
- **Detailed vegetation survey:** NVC survey, vegetation monitoring, condition assessment, strategic botanical surveys, vascular plant surveys, lower plant survey, invasive species surveys.
- **On the ground:** Ecological clerk of works, watching briefs, supervision of contractors, tool box talks, demolition supervision.

Bowland Ecology technical staff are members of the Chartered Institute of Ecology and Environmental Management (CIEEM) and as such adhere to the CIEEM codes of professional conduct and promote their sustainable environmental objectives
